1. Introduction

This guide explains how to migrate the Alike WA Report Analysis Platform from one machine to another using the OneDrive sync process. Follow the instructions carefully to ensure your data and uploads are fully transferred

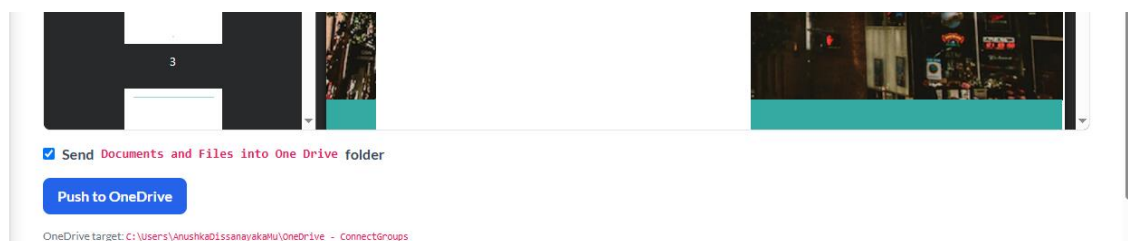

2. Migration Steps

2.1 Push Files to Onedrive

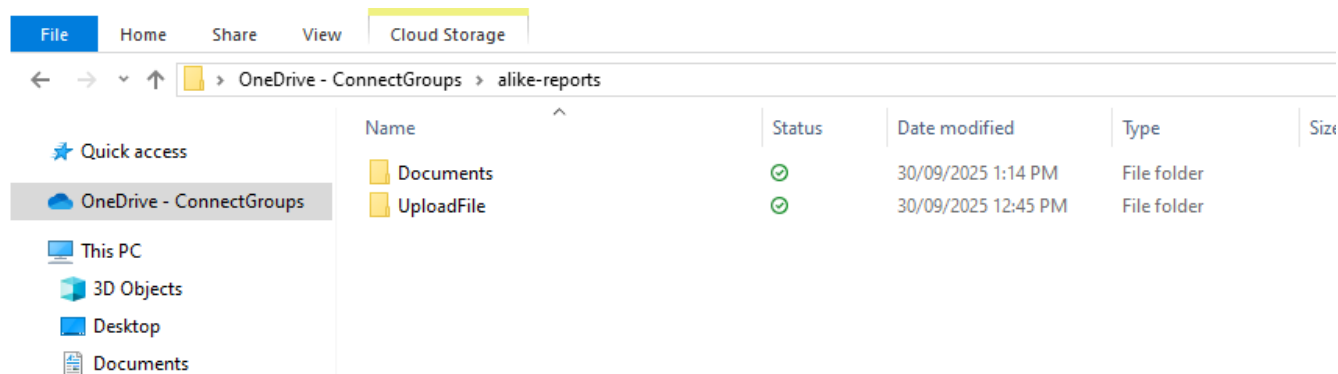

1. Open the application and navigate to the Maintenance tab.

2. Scroll down and click the button “Push to OneDrive”.

- This will copy both the **Documents** and **UploadFile** folders into your OneDrive account.
- Open OneDrive and you will see a new folder containing these two sub-folders: **Documents** and **UploadFile**. Share these folders with the new person who needs to install the application, so they can stay up to date with the current reports.

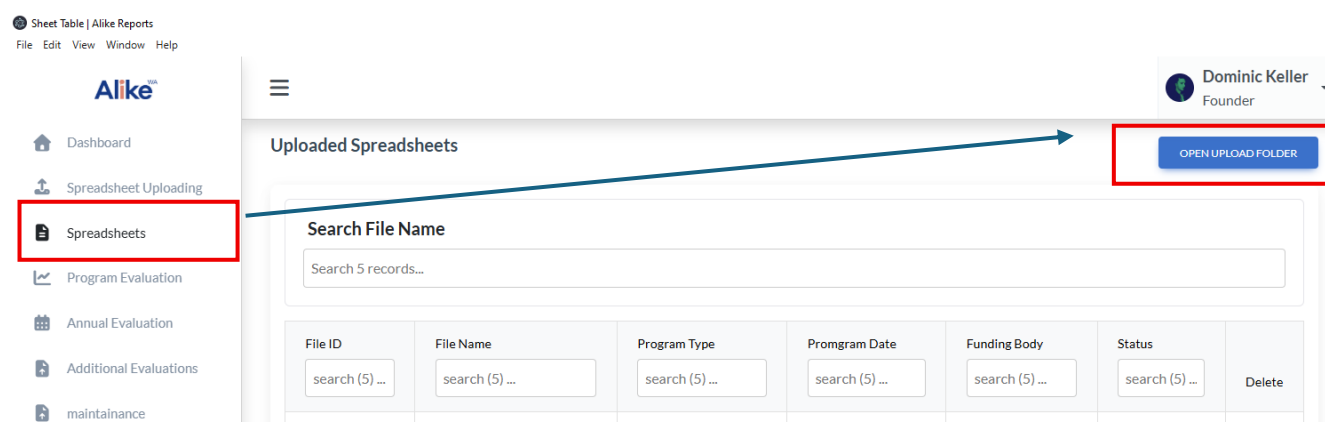

2.2 Install the Application on New Machine

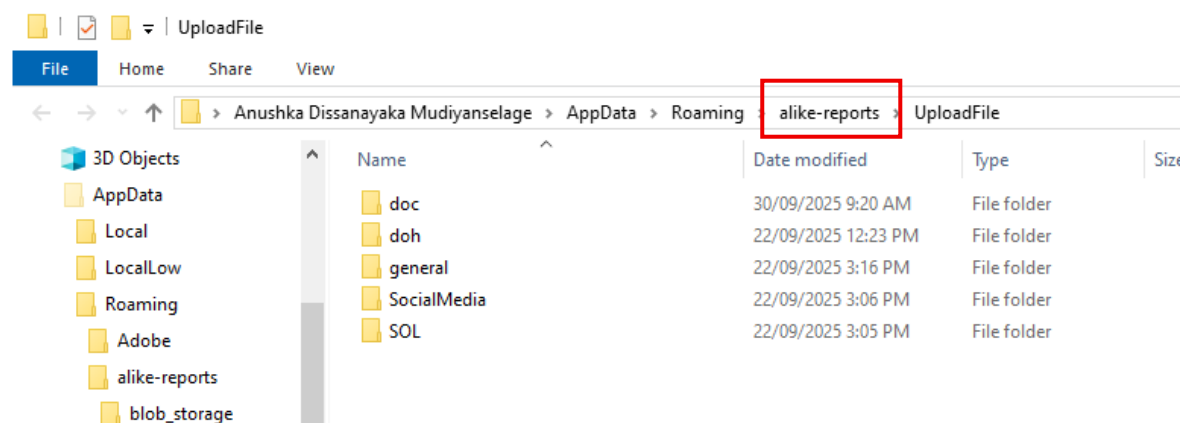

1. Install the Alike Reports application on the second machine (the one you are migrating to).
2. Launch the application

2.3 Restore Data from OneDrive

1. Open the application on the new machine.
2. Go to the Spreadsheet tab from the left menu.
3. In the top right corner, click the Upload/Open Upload Folder button.

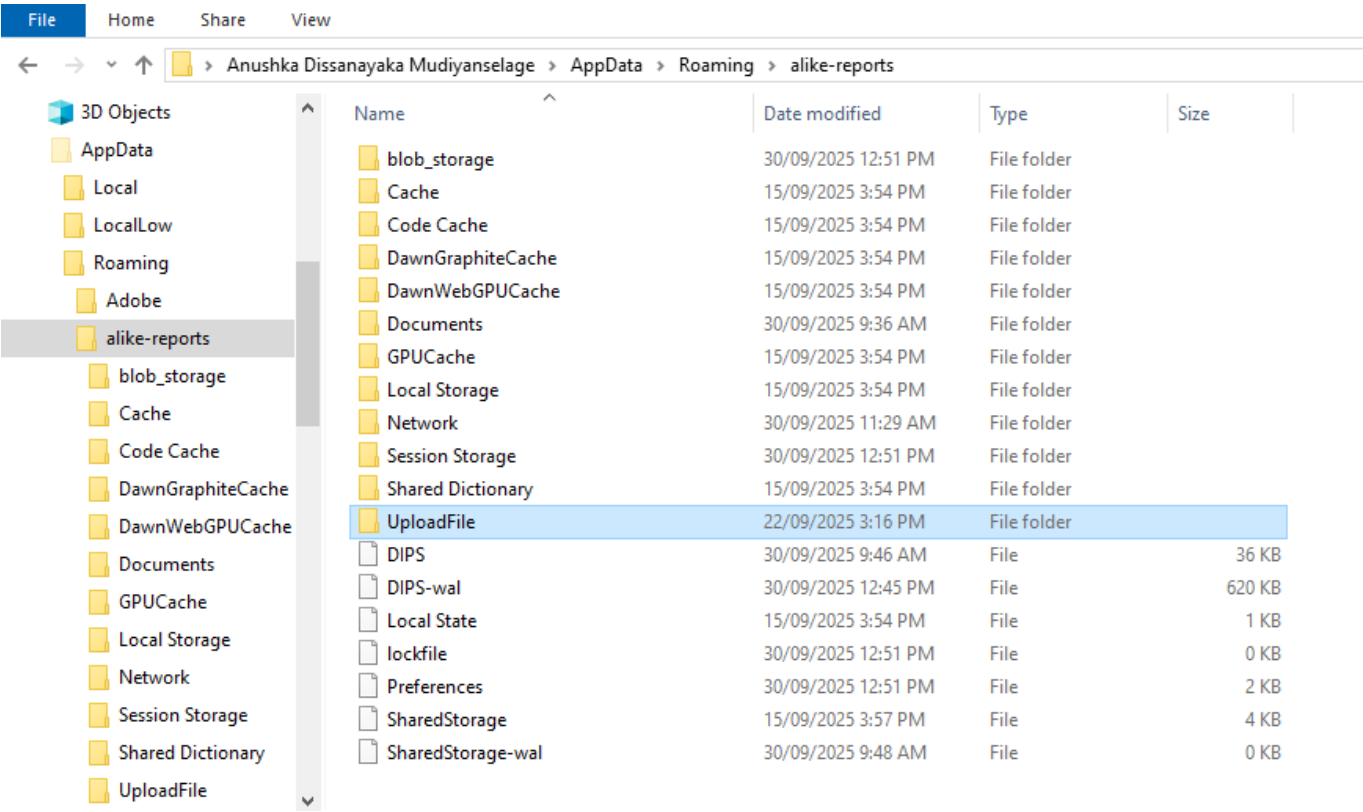

4. File Explorer will open. Navigate one step back from the opened folder.

5. Copy both the Documents and UploadFile folders that you receive from old user, and paste them into this location:

C:\Users\<YourUsername>\AppData\Roaming\alike-reports\

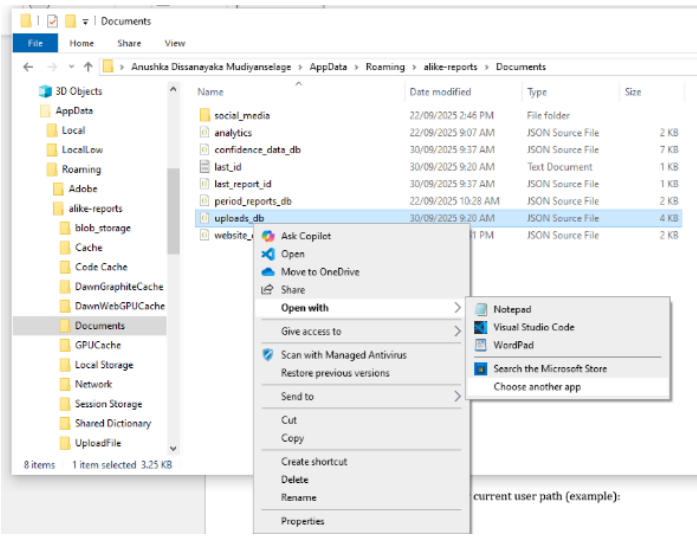

This will replace your empty folders with older documents.

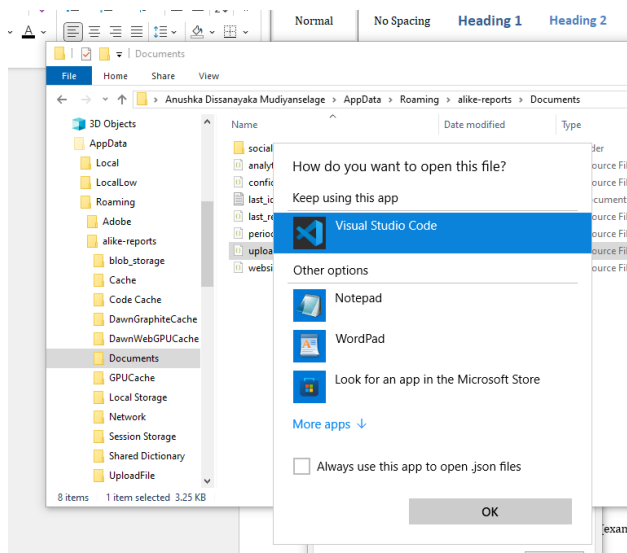

2.4 Update File Paths in Database File

1. Open Document folder above mentioned

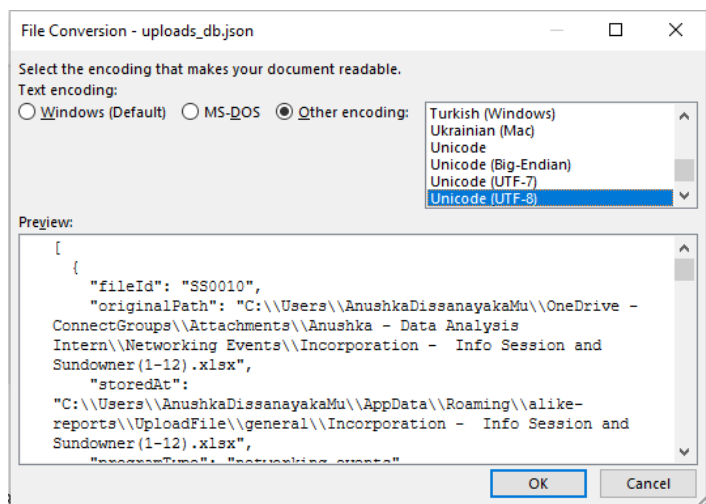

C:\Users\<YourUsername>\AppData\Roaming\alike-reports\Documents\uploads_db

2.Open the “**uploads_db**” file inside using MS Word.

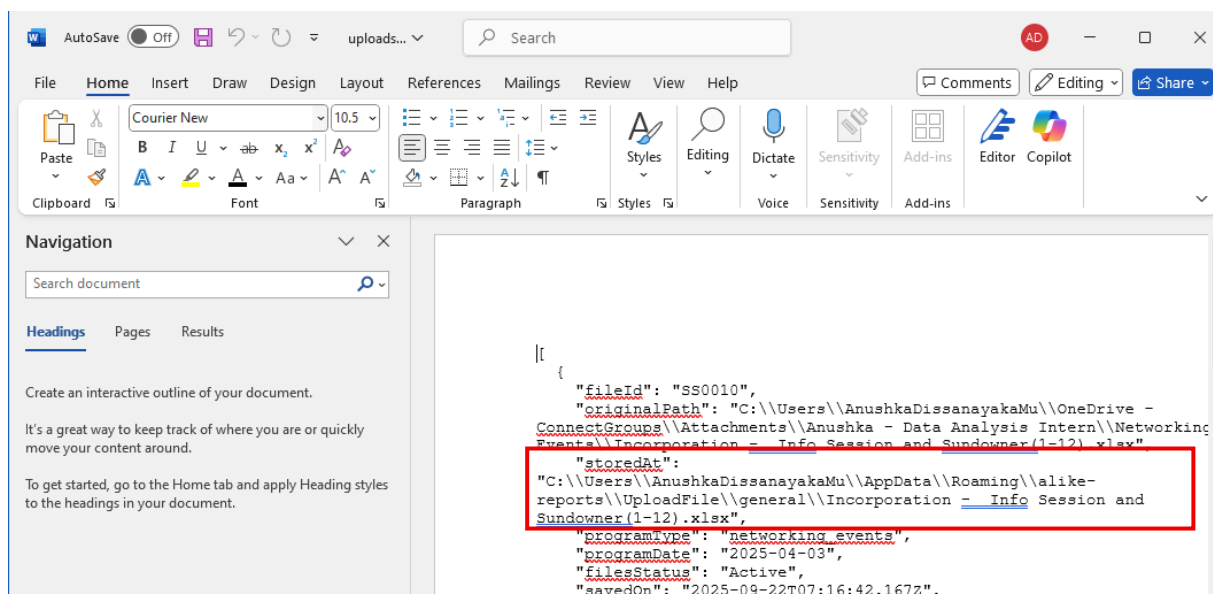

- Word will display a File Conversion dialog.
- Ensure Unicode (UTF-8) is selected, then click OK.

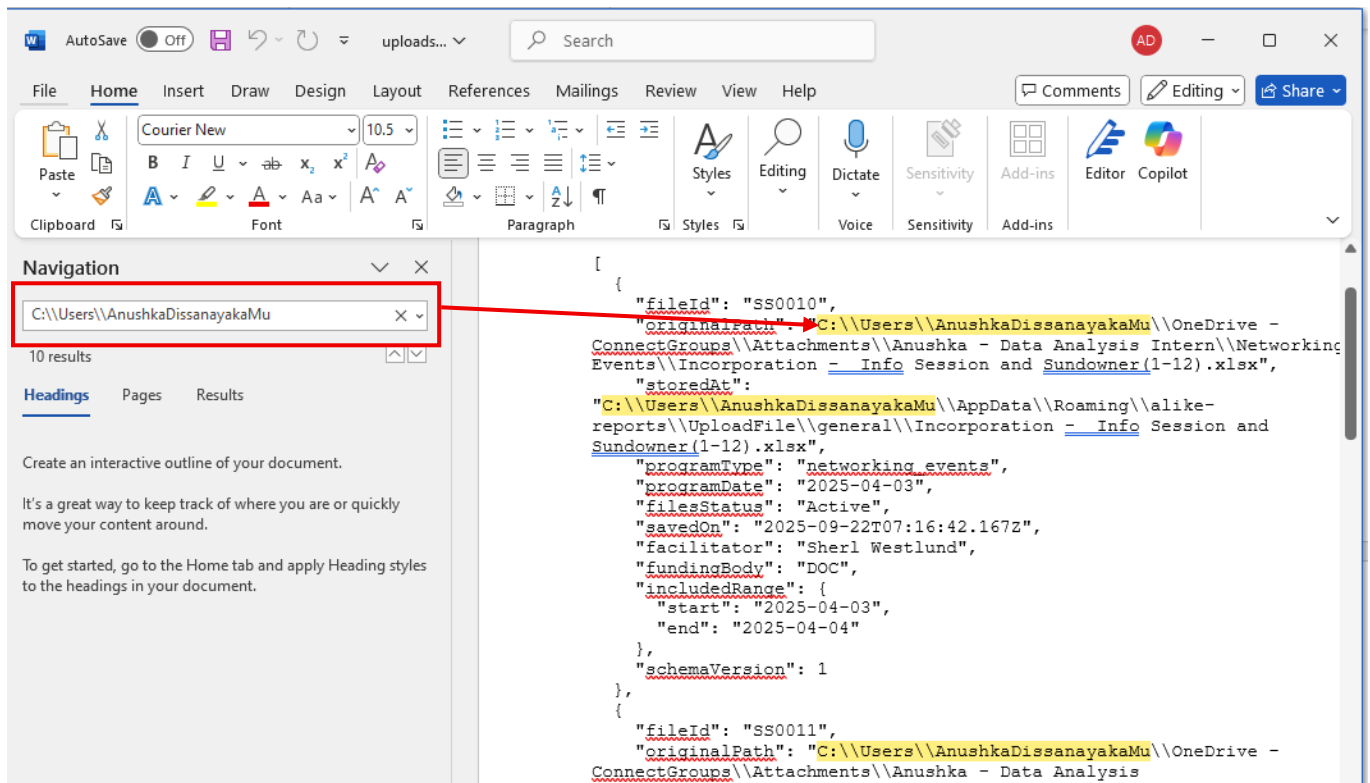

3. Press Ctrl + F to open the Find tool.

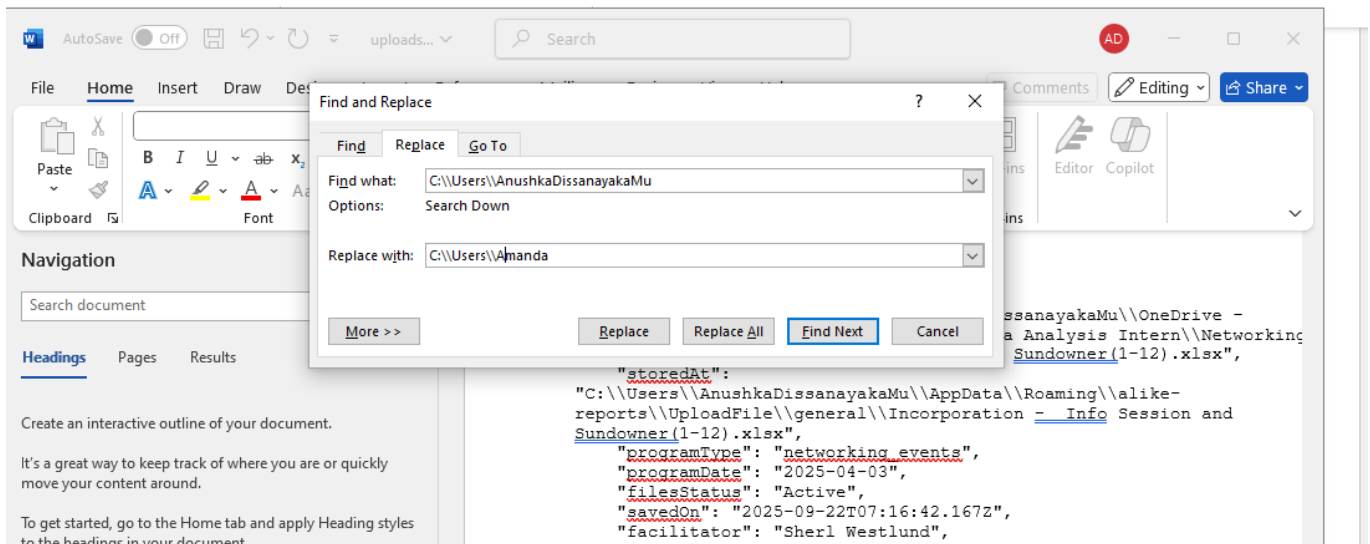

4. Copy the path until user name from that place and past it in the search box:

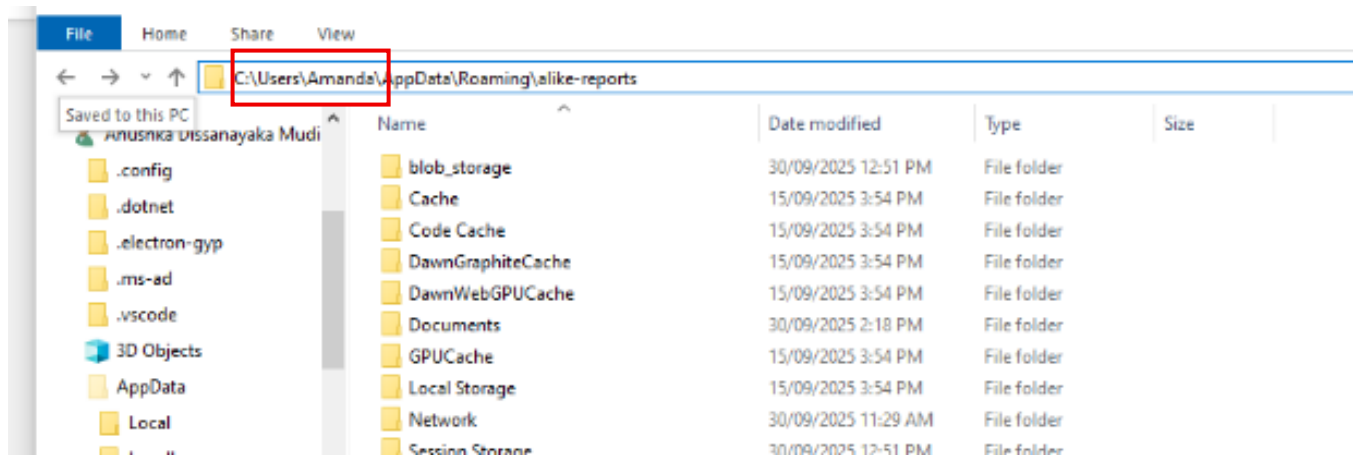

"C:\\Users\\AnushkaDissanayakaMu "

5. Click the small arrow button in that input field and then it will allow you to enable replace field. In the Replace field, enter your current user path.

To Find you path, click on the file path in file Explora which is show you in bellow.

6. Choose Replace All.

7. Save the file and close it.

3. Completion and Verification

- Your new machine is now fully migrated.
- Verify that uploaded files and documents are accessible through the application.
- Test a report to confirm the migration worked correctly
